

Allied Copper Receives Permits at the Klondike Property, Colorado

VANCOUVER, British Columbia, Canada June 22, 2022 — Allied Copper Corp. (TSX-V: CPR, OTCQB: CPRRF) (the “Company” or “Allied Copper”), is pleased to announce that the required permits have been received to begin the 2022 drilling program at the Klondike Property (“Klondike”), located in southwestern Colorado, United States. The Klondike Property consists of 76 unpatented mining claims, a State of Colorado Exploration Permit and an exclusive right to a State lease.

Warner Uhl, Chairman of Allied Copper commented, “We are very excited to commence the 2022 program at Klondike. Our previous mapping and sampling work, in conjunction with the recently completed magnetics survey, results of which will be published shortly, have identified a number of compelling targets for drill testing. Over the June quarter we have progressed our targeting initiatives whilst being cognisant of our treasury and are pleased to be in a position where we are fully funded through this program.”

The Company is finalizing bond placement to enable the program to commence on or about July 15. Planning and logistics for the program are well underway and the drill plan will be announced once details are finalized prior to the program start-up.

About The Klondike Property

The Klondike Property is located approximately 25 kilometres south of Naturita, Colorado. This property lies within the Paradox Copper Belt, which includes the producing Lisbon Valley Mining Complex. Numerous historical copper occurrences have been identified throughout the district, however, many of these have not been explored using modern exploration techniques.

A 2021 reconnaissance program consisting of mapping, stream sediment sampling and rock sampling was undertaken at the Klondike Property to help define drill targets at the West Graben Fault and East Graben Fault targets. Rock sampling and mapping successfully expanded the footprint of both targets and identified a new target named the Northeast Fault. **Sampling at the Northeast Fault returned 1.56% copper and 1.4 grams per tonne (“g/t”) silver over a 4.6 metre chip sample of bleached, bitumen spotted and altered Jurassic sandstones of the Saltwash member of the Morrison Formation.**

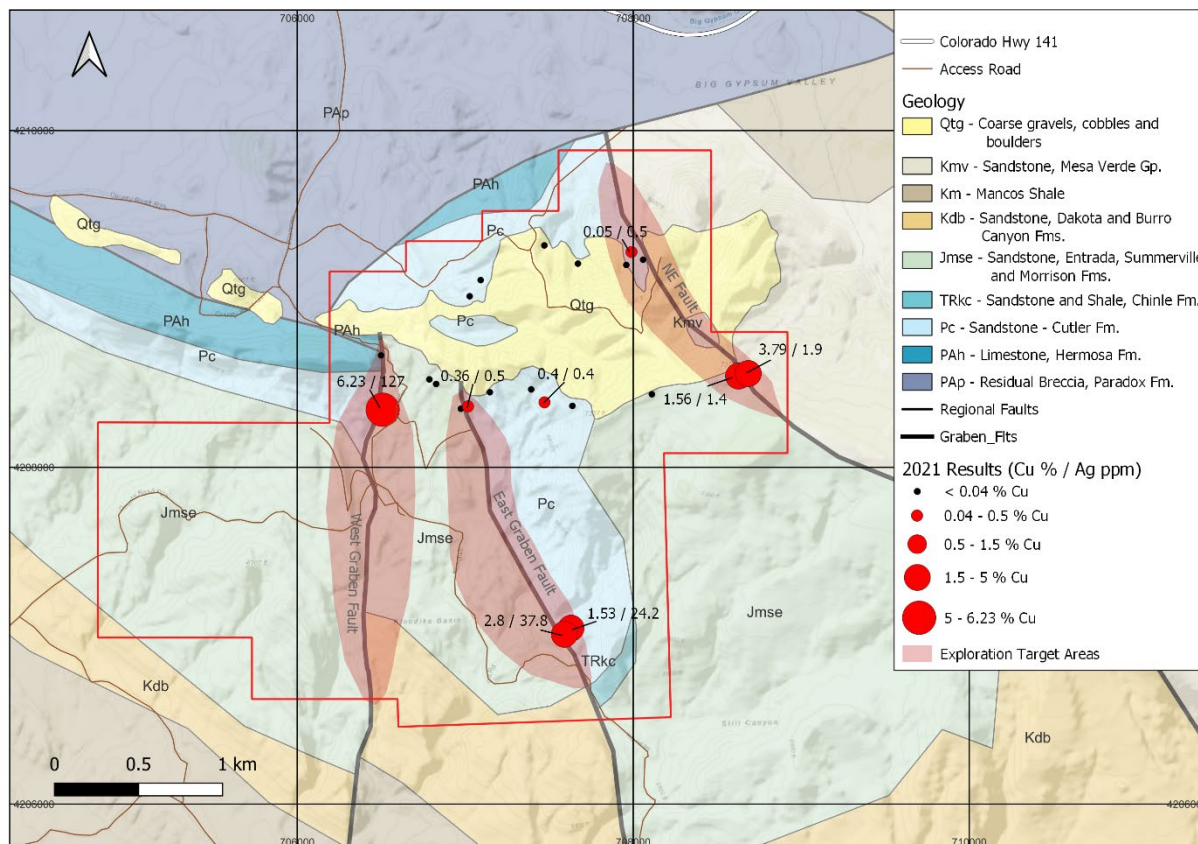

Copper mineralized sandstones at the Northeast Fault target can be traced along the fault and outboard from it into the adjacent sandstones over an area 200 metres long by 100 metres wide before becoming obscured beneath gravel cover. Further anomalous copper, including 2.1 metres of 463 ppm copper, was encountered over one kilometre to the northwest where the structure and host strata next appear from beneath the same gravel cover.

At Klondike, documented copper exploration ceased in the 1960s with subsequent exploration targeting uranium the 1970s. Previous workers reported high-grade copper mineralization highlighted by results of 6.3% copper and 23.3 g/t silver in outcrop. In addition to its high-grade potential, disseminated copper-silver mineralization has been observed which may be amenable

to modern open pit mining with Solvent Extraction Electrowinning (“SXEW”) processing similar to the Lisbon Valley Mining Complex. Sedimentary hosted copper deposits are an important contributor to world copper production, accounting for more than 20% of the world’s copper supply annually.

The project is road accessible year-round, traveling two kilometres of gravel road from paved highway. The project is comprised of 76 mining claims on Federal mineral rights managed by the BLM, in addition to an Exploration Permit and an exclusive right to a State lease from the State of Colorado.

Rene Victorino (P. Geo.) is the “Qualified Person” as defined by National Instrument 43-101 Standards of Disclosure for Mineral Projects who has reviewed and approved the technical information that is contained within this news release.

About Allied Copper

Allied Copper Corp. (“Allied Copper”) (TSX-V: CPR) (OTCQB: CPRRF), headquartered in Vancouver, BC Canada, is a mineral exploration company focused on acquiring and developing potential long life, scalable copper and/or gold assets in the Western U.S. The Company’s strategy is to focus on low cost and potential high growth operations in low-risk jurisdictions. Allied Copper’s management is committed to operating efficiently and with transparency in all areas of the business. Forward Looking Statements- Safe Harbour

This news release includes certain “Forward-Looking Statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 and “forward-looking information” under applicable Canadian securities laws. When used in this news release, the words “anticipate”, “believe”, “estimate”, “expect”, “target”, “plan”, “forecast”, “may”, “would”, “could”, “schedule” and similar words or expressions, identify forward-looking statements or information.

Forward-looking statements and forward-looking information relating to any future mineral production, liquidity, enhanced value and capital markets profile of Allied Copper Corp., future growth potential for Allied Copper and its business, and future exploration plans are based on management’s reasonable assumptions, estimates, expectations, analyses and opinions, which are based on management’s experience and perception of trends, current conditions and expected developments, and other factors that management believes are relevant and reasonable in the circumstances, but which may prove to be incorrect. Assumptions have been made regarding, among other things, the price of copper and other metals; no escalation in the severity of the COVID-19 pandemic; costs of exploration and development; the estimated costs of development of exploration projects; Allied Copper’ ability to operate in a safe and effective manner and its ability to obtain financing on reasonable terms.

This news release contains “forward-looking information” within the meaning of the Canadian securities laws. Statements, other than statements of historical fact, may constitute forward looking information and include, without limitation, statements about: anticipated timing and content of upcoming work programs, geological interpretations, receipt of property titles, and potential copper recovery processes; anticipated dates for receipt of permits, approvals and other milestones; anticipated Results of drilling programs, feasibility studies and other analyses; anticipated availability and terms of future financing; future production, operating and capital costs; and operating or financial performance. Information concerning potential contingent copper resource estimates also may be deemed to be forward-looking information in that it reflects a prediction of the copper bearing zones that would be encountered if a copper structure were developed and produced. With respect to the forward-looking information contained in this news release, the Company has made numerous assumptions regarding, among other things, the geological, metallurgical, engineering, financial and economic advice that the Company has received is reliable and are based upon practices and methodologies which are consistent with industry standards. While the Company considers these assumptions to be reasonable, these

assumptions are inherently subject to significant uncertainties and contingencies. Additionally, there are known and unknown risk factors which could cause the Company's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information contained herein. Known risk factors include, among others: fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of well results and the geology, continuity and grade of copper deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and estimated economic return; the need for cooperation of government agencies in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty of meeting anticipated program milestones; uncertainty as to timely availability of permits and other governmental approvals; increased costs and restrictions on operations due to compliance with environmental and other requirements; increased costs affecting the metals industry and increased competition in the metals industry for properties, qualified personnel, and management. All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.
